

AI-POWERED INVESTIGATIVE INTELLIGENCE

Impeachment Intelligence Platform

Transform impeachment documents, hearings, statements, court records, and media coverage into an interactive knowledge graph with natural language querying.

PRODUCT VISION

Create the most comprehensive, explainable, and evidence-backed political intelligence platform in the Philippines.

Continuous Document Ingestion	Knowledge Graph Construction	Natural Language Q&A	Interactive Graph Exploration	Timeline Reconstruction
Evidence Mapping	Senator Intelligence Dashboards	Narrative Generation	Contradiction Detection	Media Comparison

System Architecture

Government

- House of Representatives
- Senate of the Philippines
- Supreme Court
- Official Gazette

Media

- Reuters
- GMA News
- ABS-CBN News
- Rappler
- Philstar
- PNA

Other

- PDFs
- Press Releases
- Hearing Transcripts
- Public Statements

INGESTION PIPELINE

Sources → Firecrawl → Document Store → Entity Extraction → Relationship Extraction → Graph Builder → Graphify → Query Layer → AI Agents → Frontend

Knowledge Graph Model

NODE TYPES

Person

Politicians, Senators,
Witnesses, Lawyers

Organization

Senate, House, OVP,
Government Agencies

Event

Hearings, Votes, Filings,
Court Decisions

Document

Articles of Impeachment,
Reports, Court Rulings

Claim

Allegations,
Counterclaims

Evidence

Reports, Testimony,
Financial Records

RELATIONSHIP TYPES

FILED · VOTED_FOR · VOTED_AGAINST
SUPPORTED · OPPOSED · TESTIFIED_IN
PARTICIPATED_IN · REFERENCED
RESULTED_IN · SUPPORTED_BY · REFUTED_BY

7 Agent Architecture

Specialized AI agents
working in concert

The 7 Agents

Collector

URL Discovery · RSS Monitoring · PDF Collection

Analyst

Entity Extraction · Claim Detection · Relationship Detection

Graph Builder

Node Creation · Edge Creation · Deduplication

Timeline Builder

Event Extraction · Timeline Creation

Fact Checker

Source Validation · Contradiction Detection

Narrative Builder

Story Generation · Context Generation

Query Planner

User Intent Detection · Retrieval Planning

RAG Architecture

01	User Question
02	Intent Detection
03	Graph + Vector Search
04	Evidence Aggregation
05	Citation Engine
06	Answer Generation

User Features

Interactive Knowledge Graph

Search nodes, expand relationships, multi-hop traversal, filter entities

Timeline Explorer

Daily, weekly, monthly, and yearly views of events

Senator Dashboard

Statements, votes, timeline, and participation history per senator

Media Comparison

Compare facts and framing across outlets side by side

Natural Language Chat

Ask questions like: What allegations exist? Which senators supported impeachment?

Evidence Explorer

Source tracking, evidence confidence scoring, contradiction detection

Narrative Explorer

Generate structured story summaries from the underlying data

MVP Roadmap

1

Core Foundation

- Firecrawl ingestion
- Entity extraction
- Graphify integration
- Natural language chat
- Timeline

2

Intelligence Layer

- Narrative explorer
- Senator dashboard
- Media comparison

3

Advanced Analysis

- Contradiction engine
- AI witnesses
- Influence analysis

Success Metrics

QUERY ACCURACY

>90%

CITATION COVERAGE

100%

GRAPH EXTRACTION ACCURACY

>85%

AVG. RESPONSE TIME

<10s

LONG-TERM VISION

Evolve into a Political Intelligence Operating System — ingesting any major Philippine controversy, investigation, or corruption case and generating a **searchable, explainable intelligence graph**.

 AI Debate Simulator

 Political Influence Analytics

 Multi-Case Support

 Real-Time Monitoring
